Why do we need artificial molecular machines?

“I feel a bit like the Wright Brothers” ... “People were saying, why do we need a flying machine? Now we have a Boeing 747 and an Airbus. That’s a little bit how I feel. The opportunities are great.”

Ben Feringa

phone call to the Royal Swedish Academy of Sciences, 5 October 2016

“What would be the utility of such machines? Who knows?” ... “I can't see exactly what would happen, but I can hardly doubt that when we have some control of the arrangement of things on a small scale we will get an enormously greater range of possible properties that substances can have, and of different things that we can do.”

Richard Feynman

talk at the American Physical Society meeting, 29 December 1959
